Final Analytical Report

Site Name ----------Oil Trust Fund

Sample Collection Date(s)-- 07/08/10

Contact---------- Rich Mayer (6PD-F)

Report Date---------- 07/14/10

Project #---------- 10REG196

Work Order(s)----------1007012
1007013

Analyses included in this report:

LC DOSS

Report Narrative

Sample 1007012-05 (vial A) showed a DOSS value of 431 ug/L (ppb). This sample was rerun with the same result. For confirmation purposes, sample 1007012-05RE1 (vial B) was extracted. DOSS was undetected above the reporting level in vial B. The laboratory is unable to confirm the presence of DOSS in the sample. Due to possible lab error during the extraction process of vial A, the results of vial B are being reported as estimated.

Standard procedures for quality assurance and quality control were followed in the analysis and reporting of the sample results. The results apply only to the samples tested. This final report should only be reproduced in full.

Reporting limits are adjusted for sample size and matrix interference.

Report Approvals:

Richard McMillin
Region 6 Laboratory Manager

David Neleigh
Region 6 Laboratory Branch Chief

Dioctyl sulfosuccinate, sodium salt (577-11-7)	U		19.4	1	07/09/10	07/11/10

This LC/MS/MS method is a developmental method that was created specifically for the Gulf oil spill by the Region 6 lab in conjunction with other EPA laboratories. Therefore it has not been validated with the normal rigorous procedures and performance data that an EPA method would normally complete before being released. Improvements will continue to be made to this method as more is learned about the nuances of this technique with these analytes and various matrices. Proper sample collection or preservation procedures have not been established and holding times are unknown.
